

The form of the young family and the new year of Uzbekistan, social-moral properties

Rakhimova Raykhan Abdurasulovna

Researcher of «Family and Women» Research Institute

Annotation: In this article, the age of Uzbekistan the establishment of the family, and in which the formation of the social-moral properties, the description of the young family me'zon, is doing the word about the stage. And family problems and efforts to prevent problems that come out also mentioned as a way to keep the action noted.

Key words: Uzbekistan, family, contemporary society, family issues, market economy, relations, marriage, social relations, family psychology.

As a young family, the husband and wife are both over the age of 30 was increased from 10 years of experience in the marriage or family of the young family is provided. Of the republic of Uzbekistan “on state youth policy” in accordance with article 3 of the law, the couple both of a child over the age of thirty or family (children) bringing up father or the mother who brought up from the age of thirty, alone alone, which consists of the family, including marriage, separated, widowed men (widow) - are defined as young families. At the present time in official documents in the literature and pedagogy of the "young family" there is not a single approach to determine the concept. So, the main features of the young family - official association of marriage and the spouse on the basis of the configured age limit - the age of 17 under the age of 30.

The family, “the honour of the nation” is a tool to raise career high. Children are born in the family, the education of the young generation finds some of the human qualities, the person form. In addition to the scientific analysis of the problem of the culture of family and family relations and the influence of the individual, the younger generation on the formation and development of the universal-spiritual worldview, it is an object of study of the sciences. The culture of the person in turn affecting the family relationship to the fullness of the first factor, both of the family environment both physically spiritually to be a healthy development of the society, then it will not remain without effect, positive or negative, to the solution of problems.

Comparative analysis of the properties of the east and west family when family europe specific features – a wide spread of free live without marriage, divorce increase is caused by the decrease of birth. Some western scholars have completely lost the marriage, a marriage to limit the freedom of man, it is not something that is contrary to human nature. Of course, this is wrong, is contrary to the development of mankind.

The fact that at the plenary meeting of the United Nations General Assembly on September 20, 1993, it was agreed to celebrate May 15 as the “International Family Day” from 1994, itself testifies to how relevant this issue is in the international community. In all times, the care of the state

and society was the basis for the strength and peace of the families. Therefore, the adoption of the concept of strengthening the institution of the family in our country, the adoption of 1998 “year of the family”, 2012 “Year Of The Strong Family”, 2016 “Year Of The Healthy Child and mother”, approval of its priorities and measures for implementation by the decision of the president of the Republic of Uzbekistan No. 27.06.2018 PQ-3808, as well, Since 2019, the celebration of International Family Day in our country every May 15 is a clear reminder of the family environment in our state and the current efforts to strengthen it.

In science, a description of a young family will take the following criteria:

1. a very young family – a marriage entered into from time to 4 years;
2. young families – from 5 years up to 9 years;
3. family life medium term – from 10 years up to 19 years;
4. the duration of the life of a large family – the family of those who forgive a term of 20 years and more.

Social policy in relation to the young family for the full implementation of the state family policy in modern conditions of development strategy and the development of the age, his status in the interests of the younger generation and young families and enhance the role self-awareness, it is desirable to strengthen the role of the state in creating the conditions for coordination.

In general, for further improvements in the welfare of young families should enhance enough attention to the following issues:

- Further study and analysis of the emergence of young families in modern conditions and their way of life through sociological research;
- Young families in the family-the general of the marriage relationship of objective and subjective factors of modern set theory and the analysis of the origin of the idea;
- The young person and family in the family of the decision of the decisive role of the family find understanding the interaction of formation, scientifically accurate information on the basis of studies.
- Certain conditions that are necessary to meet the needs of young families and the creation of social and economic development;
- Study the socio-economic problems in the activities of young families in a market economy and strengthen social support for the young family through the state, social organization and other public and private structures;

This task due to the society of his family, will bring huge economic benefits to the state. Doing farm work in the modern family, the work to launch the implementation of the function showing the organization of economic production work will take.

The economic function:

- plan a family income;
- allocation of money to the family's daily expenses;
- the family which takes into something after a few years of collecting funds;
- the budget of the family;
- economic proceedings;
- the blessings of material production;
- farmer resources r;
- personal factors of production.

Despite the fact that life and living conditions improve in Uzbekistan day by day and there are sufficient conditions for the well-being of the family, what seems to be missing even in a young family with all domestic problems from the outside. This is explained by those longing, the ever-increasing social needs. Therefore, the social protection of the interests of a young family in our country has risen to the level of Public Policy. A vivid proof of this is the declaration of 2007 as the "Year of Social Protection", the protection of the interests of the young family is reflected in a separate clause in the state program adopted in this year, and finally, the decree of the first president of the Republic of Uzbekistan "on additional measures for the material and spiritual support of young families", signed on May 18, 2007. The social and historical significance of the decree is that it sets out all the most important tasks related to the healthy marriage of a young family and children brought up in it. In particular, for those who want to engage in small business and private entrepreneurship, to improve the domestic living conditions of young families under the decree, provide additional material assistance in the marriage of children of low-income families and conduct wedding ceremonies, for housing construction, repair and purchase, to establish a household, mortgage for furniture and other long-term used vital goods, activities such as the preferential issuance of consumer loans are important issues that guarantee that the family will live a strong and happy life.

Today, Uzbekistan and contribute to the development of its future, first of all, to families and to children from families in many ways to the practical activities of their citizens impregnated on education. Strengthening the family, and increase the level of his marriage in the first place, to improve the health of family members urgent issues. For us in the first place, the education of

children and to give his future to create. Because our children are the future. Each goal brings out of his own society, the likelihood of the human person. Economic reforms in the further development of spiritual and moral formation of the family, the educational work conducted by the family plays an important role. Human society requires a expect to know the rules mastered taking activities allocated to specific purposes started. Only human conditions, despite the completion of the construction of history remain, but the creator of them also. Therefore, every person from the consolidation of Uzbekistan Islam Karimov in the comprehensive development of their duty in not blindly, but are required to complete on a conscious basis.

Centuries-old historical experience shows that the real wealth of society and its human generation. Therefore, their ancestors were the offspring of human emotions, philosophy east and the nurturing of the spirit of national values come in.
